

Kikoo Baby Photo Contest

WhatsApp / Meta Business AI Agent — Knowledge Base

Sources: (1) real WhatsApp Business support conversations — kikoo_wamessages.json, 1,389 messages, 207 contacts, 19 Aug – 14 Sep 2026, and (2) the live kikoo.in website, fetched and verified on 14 Sep 2026.

Document purpose: reference knowledge base for an AI/automation agent replying to customers on WhatsApp via Meta Business.

How to use this document: This knowledge base combines the recurring questions and support scripts actually used by the Kikoo team on WhatsApp with the current official policy published on kikoo.in. Where the two sources agree, the fact is stated plainly. Where they differ, both are shown, the website is marked as the authoritative source, and the agent is told what to do. See Section 0 before relying on any figure in this document.

0. Verification Summary

kikoo.in was fetched directly (homepage, How It Works, Voting Rules, Winners, About Us, Contact) on 14 Sep 2026 and cross-checked against the WhatsApp chat history. Most of what support agents said in chat matches site policy. A few figures differ — the table below flags every meaningful gap. **For live conversations, the website figures win**; the chat-only figures are kept for context because they show how support has actually phrased answers.

Free votes / day	Chat mostly said 10/day (one message said 20). The site's default is 20 free votes/day , configurable 20-50 per contest . Use 20 as the default and tell customers the exact number can vary by contest.
Top prize amount	Chat quoted a specific past contest's tiers: ₹2,500 / ₹1,000 / ₹500. The site advertises prizes " up to ₹10,000 " with a monthly pool of 90,000 Coins . Treat ₹2,500/₹1,000/₹500 as one example contest's payout, not a fixed rule — always point to that specific contest's Prize section for the real number.
Prize claim steps	Chat described a process built around an Instagram testimonial/collaboration video as the final step before payout. The official How It Works page describes a different, formal KYC pipeline : identity consent → Aadhaar/DigiLocker KYC → a private 10-second guardian video declaration → bank/UPI payout details → admin approval. It does not mention a public Instagram post as a requirement. Follow the official KYC pipeline as the source of truth; if a customer is asked for an Instagram post, treat that as an optional marketing ask, not a condition of payout, and escalate if a customer pushes back.
Claim deadline	Chat showed individual deadline dates given to specific winners. The site states a general 15-day submission window from contest completion. Both are consistent — the individual dates are just that 15-day rule applied per contest.
Photo editing rules	Chat said normal editing/filters are fine, only AI-generated images are banned. The site is stricter: " Enhanced or edited images may be disqualified " in the Contest Rules, alongside a ban on low-resolution/blurry images. Tell customers to upload natural, unedited photos to be safe.
Instagram handle	Chat referenced instagram.com/kikoo_kids . The current official Instagram is instagram.com/kikooindia . Always give the official handle.
YouTube channel	Chat shared a specific playlist link. The official channel is youtube.com/@Kikoo_photocontest ; confirm the tutorial playlist is still live before sending it, or send the channel link instead.

Support contact

Not discussed in chat. Officially: WhatsApp **+91 94101 11188**, support hours **Mon-Sat, 10:00 AM-7:00 PM**, office in Haridwar, Uttarakhand. Use these for any "how do I reach you / is anyone there" questions.

1. Brand & Product Overview

Kikoo (kikoo.in) is India's online baby & child photo contest platform. Parents register a free profile for their child, upload a photo, and collect votes from friends, family, and the public community to compete for prizes. Per the official About Us page, Kikoo describes itself as supporting **50,000+ happy families, 1M+ votes cast, and ₹10L+ (₹1,000,000+) in prizes awarded**, with entry free of charge. Kikoo is a website product — there is no separate mobile app.

Customers reach support through the official WhatsApp Business number. Common opening messages include generic greetings and direct questions such as "*How do I participate?*", "*What can I win*" and "*How does voting work?*".

Important brand-safety note

Kikoo is a distinct product from any look-alike sites. In one real conversation, a customer was mistakenly using a different platform ("*cutestchild.com*") and support clarified: "*Sorry but this is not our app our website url is [www.kikoo.in](\"http://www.kikoo.in\")*". Always confirm the customer is on **kikoo.in** before troubleshooting anything.

2. Contest Basics

Eligibility

- Kikoo does not use fixed public age brackets — when a child's profile is created with a date of birth and gender, the platform **automatically assigns** the child to their eligible age-group category and enrolls them.
- In practice, live contests run for specific age windows at any given time — chats show examples like 6 months–1 year and 1–5 years. If a child doesn't fit a currently live window, register the profile anyway; the parent is notified (by WhatsApp or email, per chat) once a contest opens for that age group.
- If there is genuinely no active contest at all, say so plainly: "Currently we don't have any active contest for your child's age group."
- Each child can hold **one entry per age-group category at a time**. A Rank-1 winner faces a cooldown before re-entering the *same* category (official default: **30 days**) — they can still enter a different child, a different category, or a future contest sooner.

Themed contests & photo standards

Kikoo occasionally runs themed contests (e.g. a "Radha Krishna" themed contest seen in chat). Both themed and plain photos are accepted for such contests. Per the official Contest Rules: all photos must be **natural and original**; **enhanced or edited images may be disqualified**; and per How It Works, prohibited content also includes unclothed/partially unclothed minors, sexually suggestive poses, excessive makeup on young children, and low-resolution/blurry images. In short: real, natural, unedited photos only.

Contest timing & phases

Contests can run as a single open round or as a multi-phase elimination format (Qualification → Quarter/Semi-Finals → Grand Finale), with only top-voted entries advancing each round; votes purchased or gifted for an eliminated child are automatically refunded. Contest end dates and result dates are announced per contest and are occasionally extended for technical reasons (this has happened before — support has messaged affected users directly with a revised date). After a contest closes there is a **96-hour audit period** before results are made public and winners are officially notified. Always check the specific contest's ranking/phases page rather than assuming a fixed schedule.

3. How to Participate — Official Step-by-Step

- 1 **Register the child** — sign up as parent/guardian via Phone OTP, Email OTP, or a linked Google/Facebook/Apple account; add the child's display name, gender, date of birth, state & city, and photos (primary, live selfie, gallery). Kikoo auto-assigns the eligible age-group category. This step is **100% free**.
- 2 **Photo approval** — every submission goes through automated screening plus human review for anything borderline. Approval is usually completed within **96 hours**, with an instant notification once the entry is live.
- 3 **Collect votes** — once live, share the profile with friends, family, and the public to gather free, purchased, and/or coupon votes (see Section 4).
- 4 **Advance through contest phases** (if the contest has more than one round) until the Grand Finale.
- 5 **Winners are announced** after a 96-hour audit period once voting closes.
- 6 **Claim the prize** via the official KYC pipeline within 15 days (see Section 6).

Participation is always **free** — this matches the site's "Free to Enter" / "100% Free" messaging and support's own line: "Participants have to pay nothing." Entries are accepted only through the website — support should redirect anyone trying to submit photos directly on WhatsApp: *"Please join on website for Contest we are not accepting photos on Whatsapp."*

4. Voting System

How voting works

A voter opens a child's profile (from the Vote section, the Contest page, or a shared profile link), logs in (or votes as a guest, where allowed), and taps **Vote**. Every vote — free, purchased, bonus, or coupon — is recorded on a secure backend ledger; nothing is calculated on the customer's device, so vote counts and rankings are transparent and tamper-resistant. The child with the highest valid vote count when the contest ends wins.

Free votes

- Official default: **20 free votes per day per voter**, configurable per contest/category in the range **20-50/day** (technical range 1-100). Chat most often quoted 10/day — treat that as outdated or specific to a particular past contest, and use 20/day as the safe default unless the contest page says otherwise.
- A **cooldown timer** applies between free votes — default **10 minutes** to recover each vote (range 1-60 minutes).

- There is also a separate **per-connection (IP) daily cap**, default **50 free votes/day** from the same connection, independent of the per-voter cap.
- Guests must log in before a vote is accepted; anyone can vote for their own child or any other child on the platform.
- Parents are encouraged to share their child's profile link with friends and family so each of them can also cast free daily votes.

Purchased & bonus votes

- Extra votes can be bought securely via **UPI, cards, net banking, or wallets** through Razorpay or Cashfree; a purchase is only credited after a **verified payment gateway webhook**, never a client-side confirmation alone.
- Every purchase also grants a **bonus vote allocation** on top of the paid quantity. Bonus votes are **locked for 24 hours** after purchase and carry an admin-set expiry date shown at purchase time.
- Chat gives one example package: **300 votes for ₹249** — confirm current pricing live on the site's Premium/Purchased Votes section, since packages can change.
- If a payment is refunded or charged back, the associated votes are reversed with a full audit trail (never silently deleted).
- Support can also manually credit bonus votes to an account (e.g. as a goodwill gesture or contest reward) — this shows up to the customer as "Your account has been credited with Premium Votes."

Coupon votes

Coupon codes (earned through promotions, referrals, or achievements) can be redeemed in the Coupons tab of the dashboard to add bonus votes. Coupons are contest/category-specific and will fail if used on the wrong contest; repeated failed redemption attempts are rate-limited.

Gift votes

A feature allowing one user to purchase votes as a gift for another participant exists in the product design but is **currently on hold** — do not promise this feature to customers.

Fairness & fraud prevention

Kikoo actively monitors for duplicate IPs/devices, abnormal voting speed, repeated failed payments, coupon brute-forcing, and suspicious account clusters, with automatic flags, holds, or reversals. This is useful context when reassuring a customer their votes are being counted fairly, or explaining why a suspicious vote pattern was blocked or reviewed.

Reassurance for customers worried about being behind

It's common for a worried parent to ask if they can still catch up. Standard reassurance used by the team: voting is fair and automatic, real organic sharing works ("Past winners have voted around 1,100 votes without purchasing any packages"), and the contest stays open to new votes until it officially closes.

5. Prizes & Rewards

Official prize framework

- Kikoo advertises prizes **up to ₹10,000** per contest, with a stated **monthly prize pool of 90,000 Coins** (site currency; **1 Coin = ₹1** per the chat-confirmed conversion) shared across **500+ winners every month**.
- Prizes come in three official forms: **gift vouchers** (delivered digitally to the registered email), **physical gifts** (shipped after KYC, to the verified address), and **free votes** (bonus vote credits for future contests).
- The About Us page also references "real cash prizes and gift vouchers," and bank/UPI details are explicitly collected during the claim pipeline (Section 6) — so a direct cash/bank payout option exists alongside vouchers, consistent with what support tells winners in chat.
- Prizes are **non-transferable and non-refundable**; unclaimed physical prizes are **forfeited after 30 days**.

Example payout tiers seen in real conversations

For at least one specific contest, support quoted these exact tiers — use this as an illustration of the format, not a universal rule, and always confirm the real number on that contest's own Prize section:

1st place	₹2,500 cash or a ₹2,500-worth gift voucher (winner's choice), redeemable at major brands (Amazon, Flipkart, Zepto, and others).
2nd place	₹1,000 cash or equivalent gift voucher.
3rd place	₹500 cash or equivalent gift voucher.
4th-10th place	Typically 50 bonus votes to use in the next contest (no cash/voucher).
Non-winners	No cost either way — "No winners or losers have to pay anything."

How rewards are counted / paid out

- Winnings are shown to the customer as **"Coins"** inside their account (site-wide currency), where **1 Coin = 1 INR** per support's own explanation in chat.
- Coins/prizes can be redeemed as a **direct bank/UPI transfer** or as a **gift voucher** for a major brand — the customer chooses, consistent with both the official payout-details step and what chat support offers.
- Only the top-ranked entries at the end of a contest are eligible for the cash/voucher tier; finishing outside the paid ranks (e.g. 4th) is **not** eligible for cash/voucher, only for the bonus-vote consolation on that specific contest, per chat.
- Processing can be delayed on weekends/non-working days — set expectations accordingly ("Due to non-working days we are unable to process your winnings on the same day, but you'll be rewarded [next business day] for sure").

6. Prize Claim Process

Follow the official KYC pipeline below as the source of truth. It is published on kikoo.in/how-it-works and differs in a few details from the more informal sequence support has used in chat (see the note underneath) — where they conflict, defer to the official steps and escalate any mismatch to the team.

Official KYC & claim pipeline (15-day submission window from contest completion)

- 1 **Confirm identity** — the winner provides identity consent and signs a digital parent/guardian declaration form.
- 2 **Complete KYC** — verified via **Aadhaar or DigiLocker**. Aadhaar numbers are masked, never stored in full, and never shown publicly.
- 3 **Short video declaration** — the winner uploads a **10-second video** privately confirming they are the child's guardian; reviewed privately by the admin team (this is *not* a public social-media post).
- 4 **Payout details** — the winner submits bank account or UPI details for a secure direct transfer (or selects a gift voucher / free-vote option, per Section 5).
- 5 **Admin approval** — the team reviews and approves the submission, and the prize is released.

What support has additionally asked for in chat (context, not official policy)

In real conversations, agents have also asked winners to: share first and last name, email, phone number, the child's birth certificate, and a parent's Aadhaar card; and — as a final step before payout — record a short testimonial video with the child and post it on Instagram with a collaboration invite to Kikoo (a ready-made script is offered; see Section 9). This is **not documented in the official How It Works policy**, which instead describes a private 10-second guardian video and standard Aadhaar/DigiLocker KYC. Agents should treat an Instagram post as, at most, an optional goodwill/marketing ask — never a hard condition for releasing a prize a winner has legitimately earned — and flag any customer pushback to the team rather than insisting.

Claim deadline

Officially, documents must be submitted within **15 days of contest completion**; unclaimed physical prizes are forfeited after 30 days. Chat shows this applied in practice as a specific date given to each winner (e.g. "Please claim your reward by [date]. If you do not claim your prize before the deadline, your reward will be forfeited and reallocated to the next eligible participant.") — always state the exact deadline clearly and offer to help complete any pending step.

Common claim-status replies

- If a customer asks for an update: check which KYC step is outstanding, reassure them processing is underway ("Our team is working on processing your rewards"), and name the specific next step needed from them.
- If a customer already redeemed a specific voucher (e.g. Flipkart), tell them clearly it has already been generated and to use that voucher rather than requesting a new one.

7. Account, Login & Technical Support

Identifying the customer

Before troubleshooting any account issue, ask for the **email or username used to sign up on Kikoo** — this is the single most-used opening line in the support history (used 60+ times): *"Hi! Could you share the email or username you signed up with on Kikoo so I can pull up your account?"*

Password issues

When a customer needs to reset or set a new password, the recommended format is: **8-12 characters, with at least one uppercase letter, one lowercase letter, one digit, and one special character** (e.g. Abcd@123 or Name@123). Support frequently offers to trigger a password reset on the customer's behalf. Registration itself can also be done without a manual password at all, via Phone OTP, Email OTP, or a linked Google/Facebook/Apple account.

General troubleshooting flow

- 1 Ask the customer to share a screenshot (or video) of the exact issue.
- 2 If it's a login problem, suggest: refresh the page, or fully close and reopen the page, then try logging in again.
- 3 If the issue looks like a wider/server-side problem, acknowledge it ("there was a server issue and our team is looking into it"), give a short wait time (commonly "just another 5 minutes"), and follow up to confirm it's resolved ("it's working now, please check").
- 4 If unresolved, escalate: "Let me check with the team and get back to you with a solution" / "Our technical team is looking into this."

Other account actions

- Downloading a certificate: available from the child's profile page ("Download Certificate" button) — delivered as a PDF. The site also confirms digital certificates of recognition are issued to every winner.
- Deleting an account: available from the Profile section — the customer can permanently remove the child's entry and photos at any time.
- Checking active contests/votes: customers can check the Contest page → Phases, and the Prize section, for status.

8. Content & Photo Guidelines

- Only real, natural, original photos of the child should be uploaded. Per the official Contest Rules, **enhanced or edited images may be disqualified** — this is stricter than "AI images only are banned"; advise customers to avoid heavy editing or filters generally, not just AI generation.
- **AI-generated images are not accepted** at all.
- Also prohibited per the official photo-moderation policy: unclothed or partially unclothed minors, sexually suggestive poses/angles, excessive makeup on young children, and low-resolution/blurry images.
- Every photo goes through automated screening plus human review, with approval usually completed within 96 hours.

- Kikoo states it never collects personal information from children under 13, and a child's full date of birth and sensitive contact details are never shown publicly — useful reassurance for privacy-conscious parents.

9. Social Media & Official Channels

Official channels (verified on kikoo.in, 14 Sep 2026)

Instagram	instagram.com/kikoo_kids/ handle (kikoo_kids); always give this one.
YouTube	youtube.com/@kikoo_kidss
Facebook	facebook.com/profile.php?id=61590927142503
X (Twitter)	.com/kikooindia

Tutorials

A recurring, very common reply in chat is to point customers to step-by-step video tutorials, e.g. a specific YouTube playlist link. Since the official channel handle differs from what's in the chat history, **verify the tutorial playlist is still live before sending it**; if unsure, send the official channel link instead: youtube.com/@Kikoo_photocontest.

Sample winner testimonial script

Support has offered winners a ready-made short testimonial they can say on camera or use as a caption if they choose to post about their win (see the note in Section 6 about this not being a mandatory claim step):

"We're so happy to share that our little one won the Kikoo Baby Photo Contest! Honestly, taking part was super easy, and it felt like a 100% safe and secure platform. We also received our prize right on time. It was a great experience with Kikoo — you should upload your baby's photo on Kikoo too!"

A Hindi/Hinglish version with the same structure (greeting, naming the child and the win, calling out ease of entry and safety, confirming the prize arrived on time, warm sign-off) has also been used with winners in chat; source the exact Devanagari text from the support script library when a customer needs it, and mirror whichever language — Hindi, English, or Hinglish — the customer is using.

10. Frequently Asked Questions (verified)

The highest-frequency real customer questions from WhatsApp history, with answers reconciled against kikoo.in as of 14 Sep 2026.

Customer asks	Recommended agent reply
How do I participate?	Register your child (Phone/Email OTP or Google/Facebook/Apple sign-in), add their profile and a natural, unedited photo, and submit. Kikoo auto-assigns the right age-group contest. It's completely free, and entries go live after a review (usually within 96 hours).
What can I win?	Prizes up to ₹10,000 per contest — gift vouchers, physical gifts, free votes for future contests, or (per support in chat) direct cash/bank transfer. The exact tiers vary by contest, so check that specific contest's Prize section.
How does voting work?	Open the child's profile (Vote section or shared link), sign in, and tap Vote. The default is 20 free votes/day (site range 20-50/day depending on the contest) with a short cooldown between votes; extra votes can be purchased if you want to vote more at once.
How do I buy votes?	Open the child's profile or the Vote section, go to Purchased/Premium Votes, and choose a package — payment via UPI, card, net banking, or wallet through Razorpay/Cashfree. Every purchase also adds bonus votes (unlocked 24 hours after purchase).
Is my child eligible? / My child is [age] — can they join?	Age eligibility is assigned automatically from your child's date of birth when you register their profile. If no contest is live for their age group yet, register anyway — you'll be notified when one opens.
Do I have to pay to join?	No. Registering and voting up to the free daily limit is completely free. Paid votes are optional, only if you want to boost your child's tally.
How many free votes can I get per day?	The site default is 20 free votes per day per voter; some contests allow up to 50/day. Always check the specific contest for its exact limit.
Winner ko kya milega? / What does the winner get?	Winners can receive gift vouchers, cash/bank transfer, physical gifts, or bonus votes, up to ₹10,000 depending on the contest and rank — check that contest's Prize section for the exact tiers.
Result kab aayega? / When will results be announced?	Contests enter a 96-hour audit period after voting closes, then winners are notified by email/in-app message and results are published. Occasionally extended for technical reasons, in which case affected users are notified directly.

Customer asks	Recommended agent reply
I can't log in / forgot my password.	Share the email or username you signed up with and we can help reset it — use a format like Abcd@123 (8–12 characters, upper + lower case, a number, and a special character). You can also sign in via Phone OTP, Email OTP, or Google/Facebook/Apple instead of a password.
The website/page isn't working.	Please share a screenshot of the issue. Try refreshing the page, or fully closing and reopening it, then log in again. If it persists, our technical team will look into it and we'll update you shortly.
I want to delete my account.	You can permanently remove your account, child's entry, and photos from the Profile section at any time.
How do I share my child's profile with friends/family so they can vote?	Open your child's profile — there's a Share option there. Send that link to friends and family; each of them can log in and use their free daily votes for your child.
I won — what's next?	Congratulations! You'll need to confirm your identity, complete KYC via Aadhaar or DigiLocker, submit a short private guardian video declaration, and provide bank/UPI details (or choose a gift voucher). Please complete this within 15 days of the contest ending. Our team may also invite you to share your experience on Instagram, but that's separate from the KYC steps needed to release your prize.
Can I upload an AI-generated or edited photo?	No — only real, natural, unedited photos of your child are accepted. AI-generated images are not allowed, and heavily enhanced or edited photos may also be disqualified.
This isn't your app / a different site opened.	Our official website is kikoo.in only — please make sure you're not on a look-alike site. If you landed on a different URL, that isn't Kikoo.
How do I contact Kikoo directly / is a human available?	You can reach us on WhatsApp at +91 94101 11188, or by email through the Contact page, Monday–Saturday, 10:00 AM–7:00 PM. We usually reply within 24 hours.

12. Agent Tone, Style & Escalation Rules

Tone

- Warm, brief, and reassuring — most real replies are short (a sentence or two), friendly, and to the point.
- Greet by name when known ("Hello Ankit", "Hi Neha"), and use light celebratory language for winners ("Congratulations 🎉").
- Reply in the customer's language — several real conversations mix Hindi and English (Hinglish); mirror the customer's language, but switch to English if asked ("English please").
- When something is delayed (payouts, technical fixes), be upfront about the delay and give a concrete next step or timeframe rather than leaving the customer waiting silently.

Always confirm before troubleshooting

For any account-specific question (votes, ranking, prize status, login), first ask for the **email or username** used to sign up so the right account can be looked up — do not guess or assume details.

Prefer official policy over chat habit

Where this document flags a gap between chat and the live site (Section 0), default to the site's published policy — especially free-vote limits, prize amounts, and the KYC claim steps — and note that details can change, so re-check kikoo.in/how-it-works and kikoo.in/voting-rules periodically.

When to escalate to a human / the wider team

- Disputes about fairness of results or accusations of unfair play — acknowledge the concern, reassure the process is fair (backend ledger, fraud monitoring), and say the case will be reviewed by the team.
- Payment/bank transfer confirmations and anything involving sensitive documents (Aadhaar, birth certificate) or bank/UPI/QR payment details — route to the verified KYC claims process, don't handle informally.
- Any customer pushback on being asked for an Instagram post as a condition of receiving a legitimately won prize — this isn't official policy; escalate rather than insisting.
- Server-wide technical issues affecting many users — acknowledge, give an ETA, and follow up rather than closing the conversation.
- Any customer confusion between kikoo.in and a different/unofficial website — clarify immediately to protect the brand and the customer.

Things the agent should never do

- Never accept contest photo submissions directly over WhatsApp — always direct to the website.
- Never promise an exact payout time beyond the standard "~15-20 minutes after the final step" / "next business day" guidance.
- Never confirm AI-generated or heavily edited images as acceptable.
- Never state a fixed free-votes-per-day or prize number as universal truth — always frame it as "typically" or point to that contest's own page, since both are configurable per contest.
